Vendor Directory Overview

Once a critical access hospital (CAH) understands the value and importance of investing in the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS), the next step is to evaluate and understand the scope and breadth of services available. While self-administration of HCAHPS is allowable, stringent survey requirements must be met. If participating in the HCAHPS survey process does not appear feasible for a CAH to undertake independently, engaging a certified HCAHPS vendor is possible. Vendors included on the Centers for Medicare and Medicaid Services (CMS) HCAHPS approved vendor list are contacted by TASC twice annually and offered the opportunity to complete a profile form to be submitted into this directory.

Each vendor profile includes the following information:

- Contact information
- Location of services offered
- Experience in working with small rural hospitals
- Survey mode (mailed, telephone, interactive voice recognition, combination)
- Services provided
- Cost structure and price
- Frequency of reporting to CMS
- Frequency of reporting to the client and any additional information cited by the vendor

This directory has made every attempt to present the vendors' information in a neutral, unbiased manner. Inclusion in this directory is voluntary for the vendor; therefore, this is not an exhaustive list of certified HCAHPS vendors. A complete list is available on the [HCAHPS website](#). In the case of any discrepancies, the approved vendor list should be referred to as it may be updated more frequently than this directory.

Of the 20 featured HCAHPS vendors in this directory, all indicated offering services nationally, with some listing experience in working with small rural hospitals. Many vendors specifically noted their exclusive specialization with this population.

Vendors were requested to identify public service offerings, such as benchmarking data, competitor comparison reports, customized survey questions, or group/networking pricing included in a basic HCAHPS package. There was wide

variety in these service offerings, which is available in the Services Checklist of each vendor page if completed by the vendor.

There was variety in the cost structure and price, and the majority of vendors chose not to relay their prices and encouraged hospitals to contact them directly. In contrast, others outlined detailed cost structures and service packages.

Please contact vendors directly for an exact quote for services as prices may vary and are subject to change.

The frequency for which an HCAHPS vendor reports results of the HCAHPS assessment findings to CMS is quarterly for most vendors, with some providing survey results daily, weekly, or monthly.

The frequency of vendors reporting HCAHPS data back to the client varies from an immediate receipt to quarterly. The mode of survey administration appears to contribute to the turnaround time of client feedback, with phone and Interactive Voice Recognition (IVR) modes providing a timelier result.

Additional information was also collected from each vendor regarding their unique perspective on administering HCAHPS surveys, which readers are encouraged to review. We understand there is increasing interest in Emergency Department (ED CAHPS) vendors. Many of the vendors in this directory could potentially be able to administer that survey as well. By reviewing their website and directory submission, these vendors could be available for ED CAHPS, but you are encouraged to contact vendors for confirmation and more information.

- Arbor Associates, Inc.
- Custom Survey Solutions
- Survey Solutions by ICAHN
- JL Morgan and Associates
- Professional Research Consultants, Inc. (PRC)
- RMS – Research and Marketing Strategies, Inc.

This is not an all-inclusive list in this directory, as this was not explicitly asked in the vendor directory questions.

Introduction

The Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey, developed by the Agency for Healthcare Research and Quality (AHRQ), and implemented by CMS, is a standardized 32-question, inpatient experience survey tool that can elevate the quality and safety of hospital health care services across America and transform the way hospitals do business. The three primary objectives for administering this standardized inpatient experience survey instrument include:

- Enabling objective and meaningful comparisons between hospitals for public reporting
- Increasing hospital accountability and incentives for quality improvement
- Enhancing public accountability through increased transparency

There are two versions of HCAHPS, one for children and one for adults. The focus of the Medicare Beneficiary Quality Improvement Project (MBQIP) is for the adult version. The Adult HCAHPS survey and data collection process is administered to discharged hospital patients over 18 years of age that have received medical, surgical, or obstetric care and have spent at least one overnight stay in the hospital. Approximately 80% of all inpatients qualify to receive this survey. For a complete listing of patient qualifications, reference [the HCAHPS website](#).

Inpatient Prospective Payment System (IPPS) hospitals must administer the HCAHPS survey and publicly report the findings to receive CMS's full annual payment update. Although HCAHPS data are not currently a requirement for CAHs to receive full payment from CMS, HCAHPS data are part of the patient engagement domain of MBQIP. Furthermore, participating in HCAHPS can assist CAHs in preparing to link reimbursement to quality performance. Pediatric, psychiatric, and specialty hospitals are excluded from participating in the HCAHPS process.

Hospitals participating in HCAHPS can self-administer the survey process if [strict criteria](#) are met, or they can select a trained, certified vendor to administer HCAHPS. To meet the HCAHPS guidelines monitored by CMS, hospitals, or the vendors with which they contract must adhere to a standardized data collection process. This process includes:

- Obtaining a randomized survey sample of discharged inpatients
- Administering a standardized survey instrument on patient satisfaction of services and care via mail, telephone, IVR, or a combination of modes

- Adhering to guidelines for data coding and response rate calculations
- Systematically analyzing, preparing, and submitting data, including implementing quality check activities
- Reporting hospital results publicly

Survey questions address the following topics:

- Communication with nurses
- Communication with doctors
- Responsiveness of hospital staff
- Pain management
- Communication about medicines
- Discharge information
- Transition of care
- Cleanliness of hospital environment
- The quietness of the hospital environment
- Overall hospital rating
- Recommend the hospital

Questions are focused on obtaining the patient's perception of quality. Research suggests that patient perceptions of quality influence their choice of health plans and providers, patient complaints and malpractice claims, adherence to medical advice, and overall health status outcomes.

To ensure fair and accurate comparisons across hospitals, a CMS and HCAHPS Project Team apply adjustments to eliminate any advantage or disadvantage in scores beyond a hospital's control, such as the survey mode. CMS publishes HCAHPS results quarterly on [the Hospital Compare website](#). Each question has a top box or most desired answer option(s); only these responses are reported publicly.

Suppose hospitals take the time to invest in completing HCAHPS. In that case, they are more likely to ensure they are meeting their mission, protecting their bottom line, enhancing their reputation, and, foremost, improving patient care due to their increased dedication to implementing safe, quality improvement initiatives based on the HCAHPS data.

HCAHPS plays a significant role in reimbursement due to the Patient Protection and Affordable Care Act (PPACA), which established a [Value-Based Purchasing \(VBP\) Program](#). VBP translates into a pay-for-performance reimbursement strategy based,

in part, on performance for specified measures that are part of the Hospital Inpatient Quality Reporting Program (IQR) as monitored through CMS for those hospitals under IPPS. This movement to tie reimbursement to performance on quality metrics, including patient experience, means hospitals are accountable for providing excellence in safe, quality patient care.

HCAHPS participation as a requirement in MBQIP by CAHs was previously mentioned. MBQIP, designed by the Health Resources and Services Administration (HRSA), Federal Office of Rural Health Policy (FORHP), is a voluntary program created to improve overall health care outcomes and enhance safe, quality patient care. A portion of this project is dedicated to encouraging CAH participation with the HCAHPS process and subsequent development of quality improvement initiatives. MBQIP provides CAHs with a rural-relevant, national benchmarking system to compare HCAHPS scores, develop tools, highlight resources, and identify best practices for improving health care outcomes.

Additional HCAHPS Resources

- [HCAHPS 101](#): This webinar recording provides an overview of research conducted about HCAHPS use in CAHs.
- [Moving HCAHPS Into Practice in CAHs](#): This webinar recording provides information about HCAHPS, including why HCAHPS are important to CAHs, their value, and the challenges and opportunities related to them.
- [Study of HCAHPS Best Practices in High Performing CAHs](#): This document from Stratis Health shares improvement strategies and effective best practices for each component of HCAHPS, collected from high-performing CAHs across the US during a series of focus group interviews conducted in late 2016.
- [Patient and Family Engagement in Critical Access Hospitals: A Flex Program Story](#): This resource highlights how the Kansas state Flex Program, in contract with the Kansas Hospital Education and Research Foundation (KHERF), developed a program to support CAHs in implementing aspects of Patient and Family Engagement (PFE).

Staffed toll-free hotline for patient's questions	Yes	No

Cost Structure and Price

Arbor Associates, Inc. does not charge for setup or online access; one fee covers everything. Cost is based on the hospital size, starting as low as \$995 per year. Contact for specific pricing.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

Arbor Associates, Inc. offers weekly, bi-weekly, or monthly reporting online for near real-time access to survey results and patient comments. We recommend open-ended follow-up questions presented to patients during phone surveys. Our reporting portal, ArborOnLine, allows hospitals to access their results and efficiently carry out any cross-references needed. It will also show benchmark top-performers (best practices) information for all HCAHPS composite questions.

Additional Information

For over 35 years, Arbor Associates has pursued its mission of creating insight for hospitals across the country. Foremost is providing clients with accurate satisfaction statistical materials, plus verbatim comments at the level of HCAHPS, Emergency Department Patient of Experience (EDPEC), Outpatient and Ambulatory Services (OAS) CAHPS, Clinician & Group (CG) CAHPS, CAHPS Hospice, and Home Health (HH) CAHPS; comparing information to similar hospitals at the state and national levels. Services range from CMS-certified CAHPS surveys to online employee surveys to opinion research studies. Survey information is collected via personal telephone interviews with recent patients, a mode well recognized as best for a representative survey sample allowing for greater statistical accuracy with smaller sample sizes - which helps control costs.

Extensive patient comments clarify what patients truly appreciated about their care and how to improve their satisfaction. Arbor has an intense focus on customer

service, offers on-site or online support to their clients, and makes their staff available for one-on-one training and decision-making assistance.

CAMC Institute

Contact Information

3200 MacCorkle Avenue, SE
Charleston, WV 25304
304-388-9914
Mary Emmett
mary.emmett@camc.org

Location of Services Offered

Offers services throughout the United States.

Experience working with small rural hospitals

CAMC Institute has many years of experience working with small rural hospitals.

Survey Modes Available

Mail

Services Available

Service Description	Available	Add'l Charge
Benchmarking Data	Yes	No
Client networking/sharing of best practices	No	-
Competitor comparison reports	No	-

Hospital employee training/education	No	-
Incorporate with client's existing patient satisfaction surveys	Yes	No
Multilingual survey options	No	-
Real-time/near real-time access to collected data	Yes	No
Staffed toll-free hotline for patient's questions	Yes	No

Cost Structure and Price

CAMC Institute offers services yearly, with an annual renewable contract. Price structure varies depending upon the hospital's patient volume. There is no "flat" fee. If you are a new client, the first year's price is based on a response rate of 40 percent. That can be adjusted if the client provides prior response rate information. All patients, unless a random sample is requested, will be in the monthly raw data file. Once a baseline price is set, historical changes in patient volume can be used to set future prices. Clients pay for all postage and other charges incurred in the process of completing the survey process.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

CAMC Institute sends a raw data report to the hospital monthly unless otherwise requested. Urgent or high-importance materials are sent out immediately in PDF or fax form. CAMC Institute works with clients to design a report that best meets their needs.

Additional Information

CAMC Institute is focused on providing essential, inexpensive HCAHPS services. CAMC Institute sends data to the hospital and prefers to steer away from adjusting data and making comparisons. Inaccuracies associated with small sample sizes, regional differences, and so on are the reasons behind this decision.

Custom Survey Solutions, Inc.

Contact Information

205 McLeod Street, PO Box 312

Cost Structure and Price

Pricing is a flat yearly fee, no set-up charges, no contracts. For CAHs and smaller, rural facilities we offer the option of surveying additional observation and/or swing bed patients for no additional fee. Optional questions that can be included on our current form (4-5) will be provided at no extra charge.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

A quarterly report will be provided to the facility, however, an online data dashboard is available at SOLUTIONSonline. This provides real-time data and can be accessed by the facility at any time.

Additional Information

Custom Survey Solutions has been a CMS-approved vendor for HCAHPS surveys for over 10 years. Our response rates lead the nation with an average over 36%. Our survey analysis and reports are in an easy-to-read format that does not require additional consulting (with added fees). All mailings, administration, data entry, scanning and reporting are completed in-house by our staff; nothing is ever sub-contracted. In addition to HCAHPS surveys, we offer a wide variety of surveys for the health care industry – employee, physician, outpatient, long-term care, assisted living, clinic, etc. We specialize in offering customized services to all our clients.

Informed Decisions, Inc. (IDI) reports back to hospitals monthly and provides a quarterly summary report within six weeks of the end of the last discharge for that quarter. The summary report contains frequency data for each question.

Additional Information

IDI offers personalized HCAHPS services for its clients, especially in the upper Midwest. The organization provides over-the-phone training for its HCAHPS services. It is willing to meet with hospital leadership groups to determine the most critical issues, review the results, and help create an action plan. Using a database of responses from hundreds of other providers, IDI can benchmark organizational scores against others in the industry. At an additional cost, IDI offers employee engagement and leadership development programs.

National Research Corporation provides real-time, 24/7 access to data. Hospitals can continually track the outcome of research efforts as data comes in and is linked to the hospital's Action Plan reports. These single-page reports inform hospitals of everything they need to know about their performance and provide clear, actionable information for process improvements.

Additional Information

NRC Health has been involved with the Center for Medicare and Medicaid Services (CMS) Consumer Assessment of Healthcare Providers and Systems (CAHPS) programs since the beginning, participating in the very first CAHPS program for health plans. We bring innovative strategies to our CAHPS programs to provide value to all healthcare stakeholders.

Not only will you meet CMS requirements on the HCAHPS program, but you will also be equipped with the knowledge you need to improve your customer experience—faster.

NRC Health administers the HCAHPS Survey via mail, phone, and mixed mail and phone in a variety of languages with a focus on diligently adhering to CMS guidelines.

High quality HCAHPS service ensures our partner hospitals have positive relationships with CMS, accurate representations of their quality of care, and provides a solid foundation for learning about patient perceptions and opportunities for growth.

Additional Information

Press Ganey Associates offers several CAH-specific services, including customized survey questions available in 32 languages; a database of comparisons containing only CAHs (with the capability to compare question by question); small hospital-specific newsletter and webinars; and a dedicated team of 20 CAH/small market sales and service teams that understand the challenges of the rural, community and critical access hospitals. Press Ganey Associates features networking opportunities and sharing of best practices among its members. There is an online forum for members to seek peer support and sharing of successes. Each hospital is assigned a personal improvement manager to help raise HCAHPS scores using evidence-based best practices.

Cost Structure and Price

PRC prices its telephone surveys on a pre-completion basis based on volume.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

As interviews are completed, real-time data is available daily via their client reporting website.

Additional Information

PRC offers educational resources and sharing of best practices to improve overall quality and service. PRC offers a four-phase action planning process that helps managers manage action plans, collaborate with others, document their processes, and see the results of initiatives in real-time.

Core HCAHPS survey questions do not measure excellence. Still, hospitals can combine the essential core items with customized, hospital-specific questions to effectively analyze where to invest resources to improve performance.

Their CAHPS Team has been helping clients apply learnings drawn from Hospital CAHPS data since 2004 and Home Health CAHPS since 2010. PRC tracks industry developments and government updates and shares the latest developments in survey requirements, public reporting, value-based purchasing, and more.

Experience working with small rural hospitals

RMS works closely with small rural hospitals to ensure a seamless process. The RMS HCAHPS team is available to assist with any questions that may arise and is known for responsiveness and attentiveness. Moreover, RMS works with hospital staff to create collateral awareness building patient strategies to optimize survey response rates. RMS recognizes the unique needs of rural hospitals and works with them to be as effective as possible. RMS also conducts employee surveys.

Multilingual survey options	Yes	No
Real-time/near real-time access to collected data	Yes	No
Staffed toll-free hotline for patient's questions	Yes	No

Cost Structure and Price

RMS offers multiple pricing options, including per patient sampled and per completed survey. The price structure is customized based on the specific situations and needs of each hospital. There is a one-time fee for setting up the process and no monthly or annual base fees. Please call for a free consultation and price quote.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

RMS will provide a monthly report of the survey results, including response rates and counts for CMS reportable measures (one month only), national benchmarking with Top Box Scores, and patient comments. Clients will also have use of the RMS HCAHPS portal where you have real-time, interactive access to your data at any time, as well as RMS aggregate benchmarking.

Additional Information

RMS is a full-service research firm with a dedicated healthcare division. The firm offers many consulting services in addition to HCAHPS, including employee surveying, strategic planning, image and awareness surveys, brand/logo studies, community health needs assessments (CHNA's), healthcare transformation, PCMH support, feasibility studies and more. RMS Healthcare is a CMS-approved CAHPS vendor and has been conducting HCAHPS surveys since the 2006, followed by HH, CG, MIPS, OAS, ED, Hospice, and ICH CAHPS as they were implemented by CMS. RMS maintains an on-site telephone center with highly experienced CAHPS interviewers. All calls are recorded for quality assurance. RMS works with each client to customize projects or programs to best fit the client's individual needs. RMS was named as a "top patient satisfaction surveying firm" in the country for the past 8 years by Modern Healthcare Magazine. RMS has also been recognized for their above national response rates.

Incorporate with client's existing patient satisfaction surveys	Yes	No
Multilingual survey options	Yes	No
Real-time/near real-time access to collected data	Yes	No
Staffed toll-free hotline for patient's questions	Yes	No

Cost Structure and Price

The price structure is based on a fixed yearly base cost fee that includes setting up the process for the Hospital, data submission, reporting to the Hospital, and all training provided to Hospital staff. There is also a price per survey sent fee which covers both mailings if needed. Please contact us for pricing.

Frequency of Reporting to CMS

Quarterly

Frequency of Reporting to Client

Reporting is done monthly to each hospital for the months returned survey responses. A quarter report is also provided, including hospital comparisons within the hospital group and a separate report of four rolling quarter data. Comments from the surveys are provided monthly to each hospital. Work is currently underway to provide results in a real-time/near real-time environment.

Additional Information

Rural Comprehensive Care Network (RCCN) is a CMS-approved CAHPS vendor with over ten years of experience in administering CAHPS surveys according to CMS standards. Other CAHPS surveys RCCN is approved to administer are home health, hospice, and Outpatient and Ambulatory Services (OAS).

RCCN also administers surveys for emergency services, outpatient services, swing bed patients, and a clinic survey to help meet all their clients' needs.

To keep up with the ever-changing needs of its clients, RCCN is continually in the process of updating its reporting.

Experience working with small rural hospitals

SurveyVitals has been providing surveying services to small rural hospitals and other healthcare providers since 2005. We have been conducting CAHPS related surveys since 2010.

Survey Modes Available

Mail

Services Available

Service Description	Available	Add'l Charge
Benchmarking Data	Yes	No
Client networking/sharing of best practices	Yes	No
Competitor comparison reports	Yes	No
Customized survey questions	Yes	Yes
Group/network pricing	Yes	No
Hospital employee training/education	Yes	No
Incorporate with client's existing patient satisfaction surveys	Yes	No
Multilingual survey options	Yes	No
Real-time/near real-time access to collected data	Yes	No
Staffed toll-free hotline for patient's questions	Yes	No

Cost Structure and Price

SurveyVitals pricing depends on patient volume as well as services selected. Current CAHPS pricing ranges begin at \$2500. A standard supplemental question is provided at no additional cost to capture a patient's approval to share information at the respondent level. All approved languages are provided at no additional cost.

Frequency of Reporting to CMS

Monthly and quarterly, dependent on how clients provide their data to SurveyVitals. We customize our CAHPS program around our individual client's systems and procedures.

Frequency of Reporting to Client

SurveyVitals provides a monthly report based on core questions and respondent level data (following CMS protocol) and includes benchmark data for comparison. Monthly data includes near real-time "alerts" on low score data. "White mail" comments are also recorded and shared based on CMS protocol in the monthly report. A quarterly "snapshot report" is provided to our clients that include a trending data snapshot score. Finally, an annual summary report is provided after the year.

Additional Information

All CAHPS customers are assigned a dedicated Account Manager. These account managers work with their CAHPS clients to facilitate data feeds. They also work with clients on "alerts," improvement initiatives, "poster presentations," response rates, and improvement best practices. SurveyVitals measures the success of our CAHPS program not only in compliance but by providing easy-to-understand actionable results that drive client improvement.
