

# Rural Hospital Board of Director and Executive Leadership

This educational series presents a variety of technical topics that tend to be challenging for both rural executive leaders and board of directors. Experts explain the importance of the following topics on the organization's operations and discuss key considerations for both boards and executives.

## Each module includes:

- A 30-minute educational video
- Discussion/reflection questions for BODs and senior leaders
- Suggested activities to put learnings into action
- Supplemental resources for more information

### Corporate Compliance

This video provides boards, leaders, and physicians a basis to understand what a corporate compliance program is and why the seven elements are important to include in a hospital's corporate compliance program.

### Financial Stewardship

This video discusses the board's role in financial stewardship for an organization. You'll learn about key financial issues board of directors' face and hear some best practices and tips on how you can improve financial stewardship in your organization.

### Physician Compensation

This video discusses the importance of board engagement in physician-driven activities and provides practical approaches and methods for engagement. Understand how physicians can drive strategy, govern the risk associated with contracts, and 'lean in' on the numbers related to provider arrangements.

### Health Equity

This video defines health equity and how it can be addressed within rural communities. Understand the social influencers of health and discover ways to advance health equity, including what tools, resources, and systems might be employed and engaged.
