

Utilize our expertise to form local partnerships and engage your community to improve population health.

## Rural Health Experts Delivering Transformative Community Health Needs Assessment (CHNA) Services

### Perfect Customer Service Scores in 2019

I would use RHI's services again

I would recommend RHI's services to others

### We Know CHNAs

Since 2007, our team has provided CHNA services to **42 rural communities** in **12 different states.**

### Customer Testimonial

*"RHI did a great job conducting our CHNA. Their expertise allowed us to get valuable feedback from our community and they provided guidance as we put together action plans to create change. Their periodic phone calls after the survey was delivered ensured accountability and kept us on track."*

Aaron Saude, CEO, Bigfork Valley Hospital

## CHNA Premier Package Includes:

### Four-Page Community Survey

Customize your survey while drawing on our years of experience. We'll help you identify the questions that gather the most important information for your hospital and community.

*\*Our Basic Package excludes this survey.*

### Secondary Data

This analysis organizes county, state, and national statistics that compare your community's health status.

### Focus Group Sessions & Key Stakeholder Interviews

We will work with you to identify groups and individuals, including those that may be underrepresented in data, that can provide valuable input and facilitate interviews.

### Presentation of Findings

Engage your leadership, community health staff, and key community stakeholders with a presentation of the CHNA findings report.

### Implementation Planning with Quarterly Coaching Support

We'll facilitate an implementation planning event to build consensus on community health priorities. Ongoing technical assistance and guidance will be provided.

## Activate Your Community Health Implementation Plan

We can help you to strategically build and carry out a community health implementation plan that addresses the needs identified in your CHNA.

Customize a package that includes:

- Tools and workshops to effectively identify and engage non-traditional partners and community-based organizations in a collaborative that addresses health disparities
- A workshop for the collaborative to discover gaps, uncover assets, and set a common vision
- Engage partners in a strategic planning facilitated group workshop
- Engage partners in an action planning facilitated group workshop
