

HE IS YOUR FIRST GRANDCHILD.

Make sure you can spoil him against his parents' wishes for years to come.

Colorectal cancer is the third-most common cancer worldwide. It's recommended that men and women with an average risk start getting screened at age 45, and those with a close relative diagnosed before age 50 start screening around age 35.

Learn more at colorectal@abc-hospital.com.

Schedule a preventative screening at (800) 555-1234 or talk to your healthcare provider.
