 a spirit of the MBQIP program minations for Individuals: Oklahoma – Team - With the recent retirement of the former SFC, a team three (Korie, Pete, and Lara) has made a real difference in the use of MBQIP data in the past year, included maps in ther NCC. They are in consistent communication with their project officer, Owny, and there is a palpable ambition to expand the quality improvement program in Oklahoma in ways that may not have been considered before. Washington - Danielle Messier jumped in as a new quality coordinator, working with RQITA to learn a lot through enhanced TA, and proactively assessing her CAHs' capacity to engage in quality improvement around MBQIP measures. She also maintain an MBQIP desk manual for new CAH staff and created a simplified EDTC abstraction tool for struggling CAHs with hints, pop-ups, and interactive features. Nevada – John Packham – nominated by RQITA. John is a consistent advocate, cheerleader, and positive voice for MBQIP, particularly in his role of experienced Flex Program and mentor to other Flex program staff (he co-Chairs the NOSORH Flex Committee). Several partners are engaged in MBQIP implementation in Nevada, and they have seen strong improvement over the past two years. 	<mark>aro</mark> d is	d presented to the Flex Coordinator that exemplifies the collaborative and
