ARHP Regional Quality Improvement Collaborative Grant

Give healthcare providers/clinics the tools to succeed and provide quality care at home.
REGIONALIZED TELEHEALTH SERVICES

Through telehealth initiatives, ARHP member hospitals are providing needed services to other hospital members; thus building revenue service lines.

As demonstrated in the map, ARHP is creating HUBS within member organizations that are capable of providing services via telehealth to other member hospitals. This allows for those HUBS to create a revenue stream for their facility.
Continue to collaborate—population health is addressing all health issues; big or small.
Ensure Quality Care through healthcare provider training
