

POPULATION HEALTH TOOLKIT

NEW! Data Visualizations

In cooperation with the Federal Office of Rural Health Policy, the Population Health Toolkit now includes data visualizations making it easier for users to review and compare data. The toolkit has also been updated with the most recent data.

The toolkit is continually updated with new resources to help your facility or county navigate the journey towards improved population health along each milestone. Complete the Critical Access Hospital Population Health Readiness Assessment to connect with tools and resources targeted towards rural health organizations' unique strengths and needs for transitioning towards population health.

Compare Metrics From 12 Scenarios

The 12 scenarios listed below have been updated with new data and now include benchmarks for hospital or county-level users to compare their metrics to state and national benchmarks. All scenarios include explanations, visualizations, and instructional videos on how to use and export the data. Be sure to view the videos on how to analyze claims data.

- ⇒ Diabetes Demographics
- ⇒ Discharge Instructions
- ⇒ Emergency Department Access
- ⇒ Emergency Department Utilization and Mental Health Shortage
- ⇒ Injury Demographics
- ⇒ Patient Satisfaction
- ⇒ Social Determinants of Health
- ⇒ Socioeconomic Status and Well-being
- ⇒ Transportation and Health Status
- ⇒ Understanding of Care and County Race Demographics
- ⇒ Uninsured Rates, Behavior and Mental Health
- ⇒ Using Claims Data
