TASC Population Health Learning Collaborative: Behavioral and Mental Health

Regarding Behavioral and Mental Health in Your State:

1. How many total inpatient beds are available for psychiatric patients?
2. How many total inpatient beds are available for detox?
3. If your state moved towards population health regarding one area of mental health, what area would be most impactful? Utilize data as well as what you know and are hearing from your hospitals to decide.
4. Identify two hospitals that also are challenged with specific populations of mental illness that could be addressed. For example, high jail population, large veteran population with potential PTSD.
5. Describe any of your hospitals that are exceptional at addressing behavioral/mental health on a population health level.
