

Colon cancer is the nation's SECOND DEADLIEST CANCER for men and women.

Regular colonoscopies find cancer early when it's easiest to treat—and beat. Even better, providers remove pre-cancerous polyps to prevent cancer from developing, long before symptoms would occur.

If you're over the age of 50, call **123.456.7890** to schedule your colonoscopy or learn more at **HospitalAddress.com.**
